16. Abstract (Limit: 200 words) A cultural resources survey was conducted along the proposed ROW of a U.S. Route 202 improvements project. Preliminary reconnaissance by the Delaware Bureau of Archaeology and Historic Preservation indicated that six properties were potentially eligible for listing in the National Register. These six properties included both standing structures and archaeological resources. An architectural assessment, supplemented with historical documentation, was completed. Archaeological investigations were conducted at the Blue Ball Tavern site. A project report was prepared based on these three approaches (architectural description, historical documentation and archaeological excavation) which resulted in an assessment of impact and an evaluation of resource significance. Further investigations have been recommended.
